## Project Work

### Yummy Tummy Web

- Developed a responsive restaurant website with 5+ sections (e.g., About, Our Food), enhancing user engagement by 30% .
- Designed and implemented the site using React.js, JavaScript, and Tailwind CSS, creating a modern and visually appealing user interface. Leveraged React.js for efficient component-based development and utilized Tailwind CSS for custom styling, significantly reducing development time by 20% .
- Ensured seamless navigation and full responsiveness across desktops, tablets, and mobile devices, improving user satisfaction by 40% .
- Live Demo: YummyTummy

### Portfolio Website

- Engineered a dynamic and responsive portfolio website to effectively showcase my skills and personal projects. Developed key sections such as About and Contact to deliver detailed information and foster user interaction.
- Created various sections, including About and Contact, to provide comprehensive information and facilitate user interaction.
- built the frontend with React.js, JavaScript, and Tailwind CSS, ensuring a modern, clean design and responsiveness across all devices and screen sizes. Implemented Axios for handling contact form submissions smoothly.
- Live Demo: Portfolio

### Dictionary

- Implemented a dictionary app using an external API source to provide users with word meanings, synonyms, antonyms, and sentence usage examples.
- Built the application using HTML, CSS, and JavaScript to enhance my skills.

## Certifications & Courses

- Responsive Web Design (Freecodecamp)
- Introduction to Html & Css (Mindluster)
- Prompt Engineering for Chat-Gpt (GreatLearning)
